

JTL Pool Plant Update/Refresher – Maintaining Currency Training Programme

It is essential that all those involved in pool plant operations undergo training which is suitable, sufficient and **current** i.e. they need to keep their knowledge up to date, and need to be aware of the current issues within the industry and changes in legislation.

This **PPO Update/Refresher – Maintaining Currency** programme is aimed at operators who want to update their existing pool plant operator qualification, irrespective of who accredited it in the first place, and will provide them with a valuable CPD opportunity which will demonstrate to the authorities that update training has been provided.

The course content reflects the essential knowledge that any pool plant operator needs in order to meet both the legal requirements whilst reflecting industry best practice.

Aim:

The aim of this programme is to provide an opportunity for learners to keep their knowledge up to date, and to be aware of the current issues within the industry and changes in legislation.

This programme provides a valuable CPD opportunity which will evidence to demonstrate to the authorities that update training has been provided which is **suitable, sufficient, and current**.

Pre-requisites:

In order to qualify for the programme, learners need to provide evidence that they hold a current level 3 pool plant operator certificate, or, if recently expired, the date when the course was completed.

Assessment:

Learners will participate in taught sessions, engage in question and answer sessions, complete exercises, problem solving, case studies etc and will complete a multiple choice question paper at the end of the session.

Guided learning hours:

The guided learning hours for this programme are: **6** hours.

Course content:

- The learning aim of refreshing, revision, updating and consolidation of previous learning
- Revision quiz
- Summary of major changes which have occurred over the last three years since the learner completed their qualification
- Issues which the learners wish to be included in the programme

Learning outcomes:

Lecture and interactive presentations to enable the learner to:

1. Be aware of the major changes which have occurred since completing their last course
2. Have the opportunity to refresh, revise and update previous learning
3. Understand the importance of providing a safe and effective pool water disinfection system
4. Understand how the differing properties of the incoming mains water supply affects the treatment of pool water
5. Understand the factors which influence optimum pool water quality
6. Know the legislation, guidance documents and codes of practice which affect pool operations
7. Understand how to recognise and implement emergency procedures
8. Understand the different types of systems used in the disinfection of pool water
9. Know the different types of infections associated with poor pool water quality and poor hygiene
10. Understand the importance of encouraging the efficient use of energy

Endorsement:

This programme is **externally** endorsed by **Active IQ**, the leading **awarding organisation** in the active leisure sector, and also by **CIMSPA**, the Chartered Institute for the leisure industry.

It is recommended that the qualification is updated every three years in order to keep the knowledge current.
